

# PKF Fiberglass Stake Out Pole Instructions

Congratulations on the purchase of your new SOP from Palmetto Kayak Fishing, LLC. Here are a few tips to help you with its operation.

## **Shaft**

Our SOP can be used in a variety of ways and it is thin enough to slide through the scupper holes of most kayaks. Depending on the environment in which you are using the SOP, the tip may wear down to a cone shape over time. This is normal and doesn't affect its function. If a sharper tip is desired, simply shape it with sandpaper (**caution!** wear a respirator or proper dust mask before sanding the SOP).

## **550 Paracord Lanyard w/solid Bronze Clip**

The lanyard has been designed so that it can slide up and down the shaft and lock into place. The brass clip can be snapped to an anchor trolley (recommended) or a pad eye on your kayak when the unit is used as a leash. It is important to always be sure that the SOP is used in a manner that doesn't compromise the stability of your kayak. See our demo video at <http://www.youtube.com/watch?v=LAbJlIsn-ok> for reference.

## **Oversized Rubber Grip Handle - New for 2012!**

The new high density, tapered rubber handle allows for solid deployment and removal of the SOP. The rubber material ensures a secure grip even when wet.

*If you have any questions about how to use your new PKF Fiberglass SOP, we will be happy to help! Simply email us at [sales@PalmettoKayakFishing.com](mailto:sales@PalmettoKayakFishing.com)*

*Thanks again for your business!*
